Interest provides students with the critical, yet careful, analysis of the rapidly changing media industry that they need in order to get behind the headlines and understand our increasingly media-saturated society. Authors David Croteau and William Hoynes examine the possible influence media changes are having on society-paying particular attention to the tension between the media industry's insatiable quest for profits and a democratic society's need for a media system that serves the public interest. The Second Edition has been revised and updated to include analysis of the media business in the early years of the 21st century!

**Driving With Music: Cognitive-Behavioural Implications**-Warren Brodsky 2017-03-02 This book, the first full-length text on the subject, explores the everyday use of music listening while driving a car. It presents the relationship between cars and music in an effort to understand how music behaviour in the car can either enhance driver safety or place the driver at increased risk of accidents. A great deal of work has been done to investigate and reduce driver distraction and inattention, but this book is the first to focus on in-cabin aural backgrounds of music as a contributing factor to human error and traffic violations. Driving With Music begins by outlining the automobile, its relationship to society, and the juxtaposition of music with the automobile as a complete package. It then highlights concepts from the fields of music perception and cognition, and, within this framework, looks at the functional use of background music in our everyday lives. Driver music behaviours - both adaptive and maladaptive - are explored, with the focus on contradictions and ill-effects of in-car music listening. To conclude, implications, applications and countermeasures are suggested.

Cultures and Globalization-Helmut K Anheier 2008-09-17 The world's cultures and their forms of creation, presentation and preservation are deeply affected by globalization in ways that are inadequately documented and understood. The Cultures and Globalization series is designed to fill this void in our knowledge. In this series, leading experts and emerging scholars track cultural trends connected to globalization throughout the world, resulting in a powerful analytic tool-kit that encompasses the transnational flows and scapes of contemporary cultures. Each volume presents data on cultural phenomena through colourful, innovative information graphics to give a quantitative portrait of the cultural dimensions and contours of globalization. This second volume The Cultural Economy analyses the dynamic relationship in which culture is part of the process of economic change that in turn changes the conditions of culture. It brings together perspectives from different disciplines to examine such critical issues as: • the production of cultural goods and services and the patterns of economic globalization • the relationship between the commodification of the cultural economy and the aesthetic realm • current and emerging organizational forms for the investment, production, distribution and consumption of cultural goods and services • the complex relations between creators, producers, distributors and consumers of culture •
the policy implications of a globalizing cultural economy. By demonstrating empirically how the cultural industries interact with globalization, this volume will provide students of contemporary culture with a unique, indispensable reference tool.
